EDUCATION

University of Florida | GPA: 3.33

Aug. 2021 – May 2025

Bachelor of Science in Computer Science & Mathematics

Gainesville, FL

Relevant Coursework:

Data Structures and Algorithms, Operating Systems, Databases, R Programming, Linear Algebra, Differential Eq.

TECHNICAL SKILLS

Languages: C++, Golang, Python, Java, JavaScript, R

Developer Tools: Git, Docker, Kubernetes, Helm, Jenkins, Apache Kafka, MongoDB, Node.js, OpenAPI, Linux

Frameworks: Temporal SDK, React, React Native, Express.js

EXPERIENCE

Software Engineer Intern

May 2023 – Aug. 2023

Dell Technologies

Round Rock, TX

- Working with a Dell APEX Cloud/DevOps team on an orchestration platform for Dell’s SaaS portfolio
- Automated the deployment and execution of workflows via Docker, Kubernetes, and Helm containerization
- Developed a Golang microservice template used to integrate three Golang-based SaaS offers to the platform
- Wrote 15+ automated unit tests on a Jenkins CI/CD pipeline to test workflows and Golang microservices
- Implemented OpenAPI code generation for 400+ lines of Golang to expose service endpoints over REST

Technical Officer

Sept. 2022 - Present

University of Florida Software Engineering Club

Gainesville, FL

- Serving on the executive board of Software Engineering Club, helping lead the 60+ member organization
- Planned collaborative events with other clubs, increasing regular meeting attendance by 30% in one semester
- Led a technical workshop series introducing 25+ students to web development topics not covered in class
- Developing and leading Clubfinity, a school-wide app on the App Store worked on by members of the club

Café Manager

Apr. 2018 - Aug. 2021

Orca Café

Oak Ridge, NC

- Progressed from cashier/server to café manager at a local restaurant, working 20+ hours per week every summer
- Supervised 15+ employees by facilitating training, creating schedules, and resolving issues between employees
- Strategized with leadership on products and pricing; achieved goal of increasing profits by 15% as a manager
- Managed product inventory by taking stock, placing \$1,000+ product orders weekly, and handling food delivery

PROJECTS

Clubfinity | *JavaScript, MongoDB, React Native, Express.js, Node.js, Gitlab*

- Contributing to the development of a school-wide app to consolidate organizations in one location
- Designing and implementing user components and debugging the app using the MERN stack
- Practicing Agile development with 4 teams of 4+ students to replicate an industry standard environment
- Leading a 5-person team by creating/assigning stories and estimating story points in bi-weekly sprints

Multiplayer Mini-Crossword Game | *C++, JavaScript, React, Git*

- Developing CrossWar, an online multiplayer game inspired by the NYT’s mini crossword with 2 other students
- Implemented a backtracking algorithm in C++ and JavaScript to generate crosswords from a 10,000+ row dataset
- Designed an attractive React interface and integrated Socket.io to display opponents’ crosswords in real-time
